

Windows Terminal の設定

Windows11 では、デフォルトで Windows Terminal が入っていて嬉しい。
が、ctrl-v が copy, ctrl-v が paste になっていて ssh でどこそログインして使うには面倒。
キーバインドの設定が JSON でできるので、
ctrl-c と ctrl-v を、それぞれ ctrl-shift-c と ctrl-shift-v に変更。

```
// To learn more about actions and keybindings, visit https://aka.ms/terminal-keybindings
"actions":
[
  // Copy and paste are bound to Ctrl+Shift+C and Ctrl+Shift+V in your defaults.json.
  // These two lines additionally bind them to Ctrl+C and Ctrl+V.
  // To learn more about selection, visit https://aka.ms/terminal-selection
  // { "command": { "action": "copy", "singleLine": false }, "keys": "ctrl+c" },
  { "command": { "action": "copy", "singleLine": false }, "keys": "ctrl+shift+c" },
  // { "command": "paste", "keys": "ctrl+v" },
  { "command": "paste", "keys": "ctrl+shift+v" },

  // Press Ctrl+Shift+F to open the search box
  { "command": "find", "keys": "ctrl+shift+f" },

  // Press Alt+Shift+D to open a new pane.
  // - "split": "auto" makes this pane open in the direction that provides the most surface
area.
  // - "splitMode": "duplicate" makes the new pane use the focused pane's profile.
  // To learn more about panes, visit https://aka.ms/terminal-panes
  { "command": { "action": "splitPane", "split": "auto", "splitMode": "duplicate" }, "keys":
"alt+shift+d" }
]
```
